

*write a program to find maximum between three numbers using nested if

```
#include
#include
int main()
{
    int num1, num2, num3, max;

    // Prompt the user to enter three numbers
    printf("Enter three integers: ");
    scanf("%d %d %d", &num1, &num2, &num3);

    // Nested if statements to find the maximum number
    if (num1 >= num2)
    {
        if (num1 >= num3)
        {
            max = num1;
        }
        else
        {
            max = num3;
        }
    }
    else {
        if (num2 >= num3)
        {
            max = num2;
        }
        else
        {
            max = num3;
        }
    }

    // Print the maximum number
    printf("Maximum number is: %d\n", max);

    return 0;
}
```
